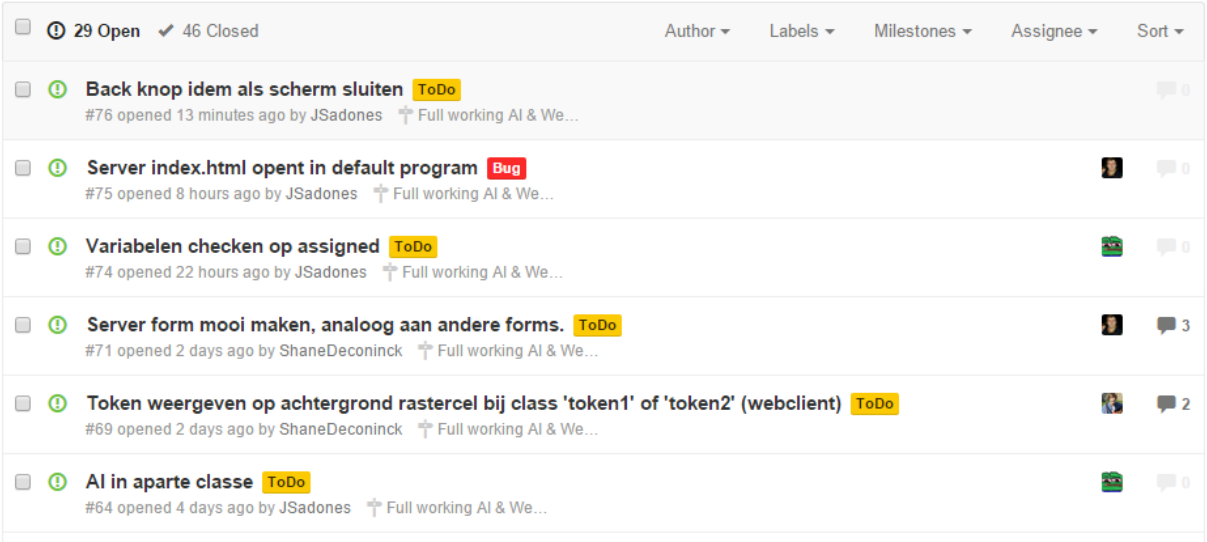
3. Taakverdeling

Gezien we in ons team met 2 ‘ervaren’ programmeurs en 2 ‘leerlingen’ zijn, was het al van in het begin duidelijk dat deze laatste wat geholpen zouden moeten worden bij het programmeren. Er werd afgesproken dat iedereen zou werken aan de code, zodat iedereen eruit kon leren. In het begin schreef Shane veel unit tests van waaruit Matthias en Lucas code schreven. In het begin ging dit niet altijd snel, maar na een tijdje lukte het voor beiden om vrij zelfstandig te werken. Jel begon aan de grafische interface van de Windowsapplicatie nadat Matthias daar low fidelity wireframes van had getekend. Na een aantal dagen hadden we onze manier van werken gevonden en ging alles vrij vlot. Shane schreef de webclient terwijl de rest van het team verder aan de werking van de applicatie werkten. We beslisten ook om met z’n allen aan dezelfde stukken te werken zodat iedereen op de hoogte is van de hele code.

Ook al werkte iedereen samen, lag de focus bij ieder persoon op een specifiek deel. Shane’s focus lag vooral op het schrijven van unittests, de webclient en webserver. Lucas werkte unittests van Shane uit, en schreef het eerste winning algoritme met Matthias. Matthias werkte vooral aan de webclient, en hielp Lucas bij het schrijven van het eerste winning algoritme. Jel schreef vooral aan de GUI, AI en winning algoritme-implementatie door gebruik van het min-max algoritme en alpha-beta pruning.

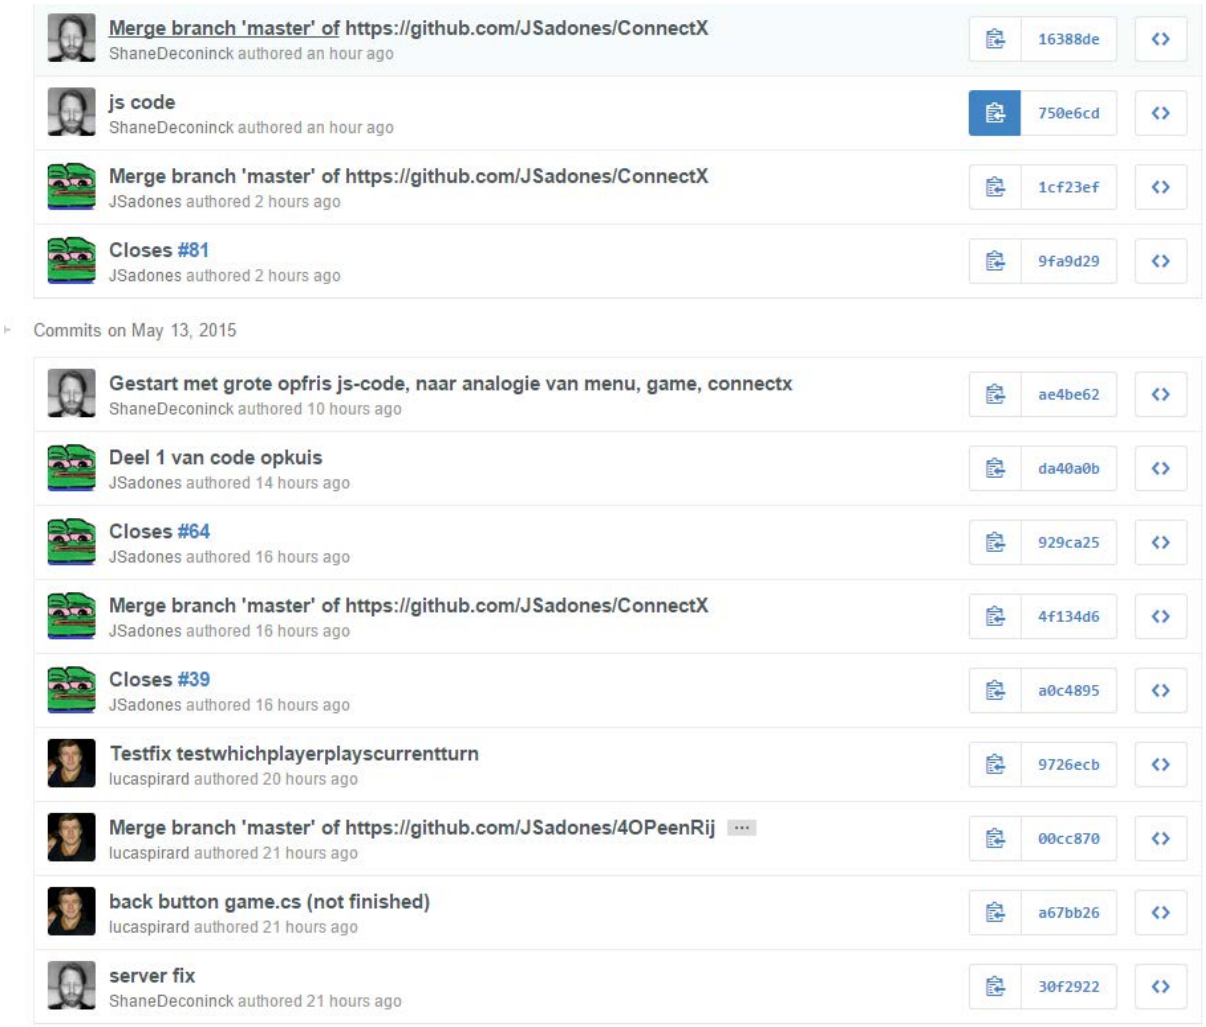
We gebruikten ook GitHub Issues om taken dat we nog moesten doen/bugs op te lijsten en daarna toe te wijzen aan een groepslid. Naast een handige oplijsting was dit een heel goed overzicht van kleinere zaken die nog afgewerkt moesten worden.



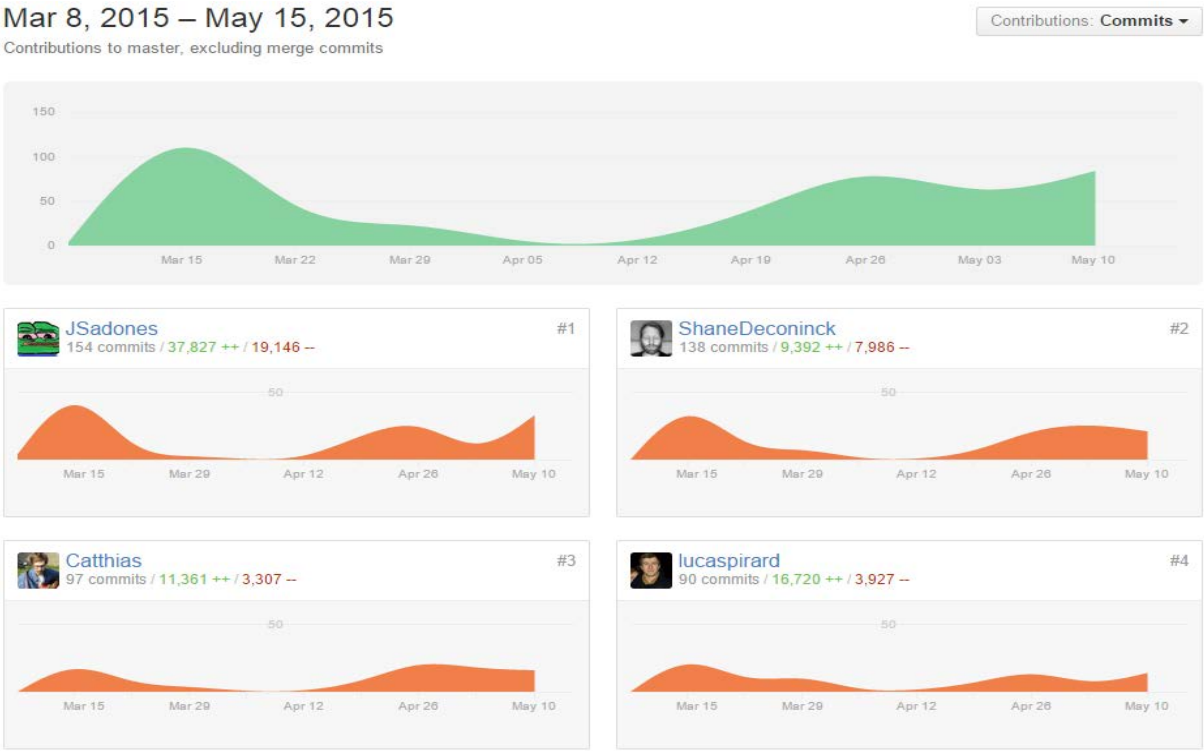
4. Studietijdmeting

Door gebruik van GitHub werd elke aanpassing aan het project automatisch opgeslagen in het logboek via de commits. De commit history is overigens volledig te raadplegen in onze repository, met alle mogelijke informatie. Achteraan dit document is een git log toegevoegd die meegeeft wie wanneer aan wat heeft gewerkt (al zijn de beschrijvingen niet altijd even duidelijk, aanpassingen aan de code kunnen worden nagegaan op GitHub zelf).

Een screenshot van tijdens het project.



En een overzicht over de volledige projectduur.



Zoals eerder vermeld is een print van het logboek achteraan dit document te vinden. Voor een uitgebreide versie hiervan verwijzen we graag naar onze repository op GitHub: https://github.com/JSadones/ConnectX/commits/master.

5. Commentaar

5.1. Shane Deconinck

Het project was een leerrijke uitdaging. De aangeleerde technologieën en methodieken kwamen vakoverschrijdend samen. Het ontdekken van de noodzaak heeft mijn motivatie voor bepaalde opleidingsonderdelen versterkt. Daarnaast was er ook het sociaal aspect van samenwerken: taakverdeling, communicatie, empathie. Het is ons gelukt om allemaal samen het project op te bouwen. Tot slot wil ik nog toevoegen dat mijn groepsleden zich heel constructief opstelden. Het was voor ons allen een leerproces, en soms ook een confronterende toetsing van onze vaardigheden.

5.2. Matthias Haelman

Toen ik met dit project begon wist ik niet goed wat me te wachten stond. Ik had alleen nog maar simpele dingen geprogrammeerd en buiten school ook nog niet veel ervaring hiermee. Ik dacht dat ik niet zoveel ging kunnen helpen. Maar dit klopte niet, mijn projectleden hebben zeer goed kunnen aangeven waarbij ze hulp konden gebruiken. Hierdoor heb ik veel geleerd in verschillende delen van het programmeren. Ik vond de leden van het project zeer goed, zou er zeker nog mee willen werken. En ik vond het project zelf een leerrijke ervaring.

5.3. Lucas Pirard

Aanvankelijk vreesde ik dat dit project heel erg moeizaam zou verlopen gezien mijn beperkte vaardigheden wat betreft programmeren. Toen we erin vlogen werd het snel duidelijk dat die vrees onterecht was. Shane en Jel leidden het project aangezien zij beter voor ogen hadden wat er kon en moest gebeuren. Ze delegeerden en gaven uitleg waar nodig. Op die manier werd het project een erg leerrijke ervaring op vlak van zowel samenwerken als programmeren zelf.

5.4. Jel Sadones

Ik vond het een zeer leuke ervaring. Ik werk graag aan projecten omdat ik er dan volledig kan in opgaan. De samenwerking met mijn projectleden was heel goed. Door middel van GitHub hielden we bij wat er nog moest gedaan worden aan het project, en gaven wij deze ToDo's door via GitHub aan elkaar. Ik heb ook veel geleerd uit C# en het samenwerken met de groep, ik kijk uit naar het project in semester 3.

    minor changes in naamgeving.

commit 93b2156a02666872a44b39cadf8a6934753d6106
Merge: 774134c fa465a7
Author: Lucas Pirard <lucas.pirard@student.howest.be>
Date: Thu May 14 10:33:55 2015 +0200

    Merge branch 'master' of https://github.com/JSadones/4OPeenRij

commit 774134c67855484db9d60db1b72e7b6457d64528
Author: Lucas Pirard <lucas.pirard@student.howest.be>
Date: Thu May 14 10:33:01 2015 +0200

    logboek first version as of thursday 14/05 10.30am

commit fa465a75360c86ca3ebfd2360aee6e3487b76a96
Merge: e15f860 0458e47
Author: Shane Deconinck <shane.deconinck@gmail.com>
Date: Thu May 14 10:31:04 2015 +0200

    Merge branch 'master' of https://github.com/JSadones/ConnectX

commit e15f860a19623cf296556d81ff0ebde50a9030a7
Author: Shane Deconinck <shane.deconinck@gmail.com>
Date: Thu May 14 10:30:51 2015 +0200

    js shuffle

commit 0458e479c3b59c6f0918b31960b4bbb14742e13e
Author: Matthias Haelman <matthias.haelman@student.howest.be>
Date: Thu May 14 10:15:53 2015 +0200

    Wireframes van Webclient, high & low fidelity.

commit 6bd2638d85b36add24682d059b38ef343e4b53e7
Author: Jel Sadones <jel.sadones@student.howest.be>
Date: Thu May 14 10:04:17 2015 +0200

    Doc aanpassen

commit 254c41f9384bc7c859f18483d88b668cd4aa4d90
Merge: 563395f c7527d4
Author: Lucas Pirard <lucas.pirard@student.howest.be>
Date: Thu May 14 10:00:47 2015 +0200

    Merge branch 'master' of https://github.com/JSadones/4OPeenRij

commit 563395f504908b6ea06477133a65a2f9544a6bbe
Author: Lucas Pirard <lucas.pirard@student.howest.be>
Date: Thu May 14 09:59:57 2015 +0200

    https://github.com/JSadones/ConnectX/issues/77 fixed both instances where hidden form was still running (menu.cs start button & game.cs back button)

commit c7527d438b4bdba8f14bc333ed4656596bd57552
Author: Jel Sadones <jel.sadones@student.howest.be>
Date: Thu May 14 09:58:37 2015 +0200

    High fidelity windows client

commit fadadc629f5255adc56b1f0aa496cb0e251ad918
Author: Lucas Pirard <lucas.pirard@student.howest.be>
Date: Thu May 14 09:39:36 2015 +0200

    Reverten naar juiste versie. Sorry Jel xoxo

commit 92cf13b9cbd1d7734ca46c905ddc3b5a26c69619
Author: Lucas Pirard <lucas.pirard@student.howest.be>
Date: Thu May 14 09:31:45 2015 +0200

    high fidelity fixed cuz Jel couldn't

commit 3d8e68d4684759400bb152de79f1cd0cc0f2eb34
Merge: 9cfed87 595e6e5
Author: Lucas Pirard <lucas.pirard@student.howest.be>
Date: Thu May 14 09:12:50 2015 +0200

    idk?

commit 9cfed87843913e334a7b463041bfa3f4a47d7450
Author: Lucas Pirard <lucas.pirard@student.howest.be>
Date: Thu May 14 09:11:16 2015 +0200

    commentaar Lucas

commit 595e6e5c4b36b0ee604f3ed279945343cb689117
Merge: ae32a0c 16388de
Author: Jel Sadones <jel.sadones@student.howest.be>
